Computer: Glossary, Definitions & Abbreviations

50 Questions • 30 Minutes

Instructions:

- Each question has 4 options (A, B, C, D).
- The correct answer is shown on the right side of each question.
- Detailed explanations with textbook page references are at the end.

Questions

Q1. DBMS stands for:

- A. Data Binary Management System
- B. Database Management System
- C. Digital Base Management System
- D. Data Block Management System

Ans: B

Q2. DHTML stands for:

- A. Data Hyper Text Markup Language
- B. Dynamic Hyper Text Markup Language
- C. Direct Hyper Text Markup Language
- D. Digital Hyper Text Markup Language

Ans: B

Q3. DOS stands for:

- A. Data Operating System
- B. Disk Operating System
- C. Digital Operating System
- D. Direct Operating System

Ans: B

Q4. HTML stands for:

- A. High Text Markup Language
- B. Hyper Text Markup Language
- C. Home Text Markup Language
- D. Host Text Markup Language

Ans: B

Q5. IAB stands for Internet Activities Board, formed in 1983, now called:

- A. Internet Advisory Board
- B. Internet Architectural Board
- C. Internet Access Board
- D. Internet Application Board

Ans: B

Q6. IAS stands for Internet Application Software also known as:

- A. Search engines
- B. Browsers
- C. Databases
- D. Compilers

Ans: B

Q7. ISP stands for:

- A. Internet Software Provider
- B. Internet Service Provider
- C. Internet System Protocol
- D. Internet Security Provider

Ans: B

Q8. Internet Society was formed in 1992 to promote: A. Television B. The use of Internet C. Radio D. Newspapers	Ans: B
Q9. A Hacker is a person who breaks into a computer system to: A. Repair it B. Get access to the information stored there C. Clean it D. Update it	Ans: B
Q10. GML stands for: A. General Machine Language B. General Mark-up Language C. Global Machine Language D. Generic Markup Logic	Ans: B
Q11. MAC OS is an Operating System used in Macintosh Computer, developed by: A. Microsoft B. Apple C. Google D. IBM	Ans: B
Q12. Linux is a Unix like Operating System with: A. Command line only B. Graphical user interface C. No interface D. Voice interface	Ans: B
Q13. Modem is a device to connect different computer systems to the internet using: A. Radio waves B. Telephone or cable lines C. Satellite only D. Bluetooth	Ans: B
Q14. Piracy is the illegal reproduction and distribution of: A. Books B. Software application C. Food D. Clothes	Ans: B
Q15. Primary Key is a field with: A. Any value B. Unique value for each record C. Same value for all records D. No value	Ans: B

Q16. RDBMS stands for: A. Random Database Management System B. Relational Database Management System C. Remote Database Management System D. Real Database Management System	Ans: B
Q17. SOLARIS is a Unix like Operating System developed by: A. Microsoft B. Sun Microsystems C. Apple D. Google	Ans: B
Q18. Tag is part of HTML. It determines: A. Color only B. The way the browser displays text in a Web Page C. Sound D. Speed	Ans: B
Q19. Unix is a powerful multiuser operating system that uses: A. Graphical interface only B. Command line user interface C. Voice interface D. Touch interface	Ans: B
Q20. CDAC stands for: A. Centre for Data and Computing B. Centre for Development of Advanced Parallel Computing C. Computer Development and Control D. Central Data Analysis Centre	Ans: B
Q21. C-DOT stands for: A. Centre for Development of Technology B. Centre for Development Of Telematics C. Computer Department of Technology D. Central Data Office Technology	Ans: B
Q22. HTTP stands for: A. High Text Transfer Protocol B. Hyper Text Transfer Protocol C. Home Text Transfer Protocol D. Host Text Transfer Protocol	Ans: B
Q23. ROM stands for: A. Random Output Memory B. Read Only Memory C. Run Only Memory D. Real Output Memory	Ans: B

Q24. RAM stands for: A. Read All Memory B. Random Access Memory C. Run Access Memory D. Real Access Memory	Ans: B
Q25. BIOS stands for: A. Binary Input Output Signal B. Basic Input-Output System C. Base Internal Operating System D. Binary Integrated Output System	Ans: B
Q26. MODEM stands for: A. Modular Device Manager B. Modulation-Demodulation C. Modern Device Machine D. Module-Demonstration	Ans: B
Q27. CAD stands for: A. Computer Automated Data B. Computer Aided Design C. Central Access Device D. Control and Design	Ans: B
Q28. LAN stands for: A. Large Area Network B. Local Area Network C. Long Access Network D. Linear Area Network	Ans: B
Q29. WAN stands for: A. Wireless Area Network B. Wide Area Network C. World Access Network D. Web Area Network	Ans: B
Q30. MAN stands for: A. Main Area Network B. Metropolitan Area Network C. Module Access Network D. Multi Area Network	Ans: B
Q31. ENIAC stands for: A. Electronic Network Integrated And Calculator B. Electronic Numerical Integrator And Calculator C. Electronic Number Input And Computer D. Enhanced Numerical Integrator And Calculator	Ans: B

Q32. FORTRAN stands for: A. Form Translation B. Formula Translation C. Forward Translation D. Format Translation	Ans: B
Q33. COBOL stands for: A. Computer Oriented Binary Language B. Common Business Oriented Language C. Central Office Business Language D. Computer Object Based Language	Ans: B
Q34. FAX stands for: A. Fast Access Xerox B. Fascimile Automated Xerox C. File Access Exchange D. Fax Automated Transfer	Ans: B
Q35. FLOPS stands for: A. Floating Line Operations Per Second B. Floating Operations Per Second C. Fast Logic Operations Per Second D. File Logic Operations Per Second	Ans: B
Q36. HLL stands for: A. High Logic Language B. High Level Language C. Home Level Language D. Hybrid Logic Language	Ans: B
Q37. IBM stands for: A. Indian Business Machine B. International Business Machine C. Integrated Binary Machine D. Internal Business Module	Ans: B
Q38. IC stands for: A. Internal Computer B. Integrated Circuit C. Input Controller D. Internet Connection	Ans: B
Q39. IP stands for: A. Internal Processing B. Internet Protocol C. Input Port D. Integrated Program	Ans: B

Q40. PSTN stands for: A. Private Switched Telephone Network B. Public Switched Telephone Network C. Protected System Telephone Network D. Primary Switched Telephone Network	Ans: B
Q41. CDMA stands for: A. Computer Division Multiple Access B. Code Division Multiple Access C. Central Data Multiple Access D. Common Device Multiple Access	Ans: B
Q42. DTP stands for: A. Data Transfer Protocol B. Desk Top Publishing C. Digital Transfer Processing D. Direct Text Processing	Ans: B
Q43. DTS stands for: A. Digital Transfer System B. Desk Top System C. Data Translation Service D. Direct Technology System	Ans: B
Q44. CAM stands for: A. Computer Access Module B. Computer Aided Manufacturing C. Central Automated Machine D. Control and Management	Ans: B
Q45. CATScan stands for: A. Computer Automated Testing Scan B. Computerised Axial Tomography Scan C. Central Access Technology Scan D. Computer Analysis Testing Scan	Ans: B
Q46. COMAL stands for: A. Computer Oriented Machine Language B. Common Algorithmic Language C. Central Object Management Language D. Computer Analysis Language	Ans: B
Q47. DOS (as abbreviation) stands for: A. Data Operating System B. Disc Operating System C. Digital Output System D. Direct Operating Software	Ans: B

Q48. LDU stands for:

- A. Large Data Unit
- B. Liquid Display Unit
- C. Light Data Unit
- D. Linear Display Unit

Ans: B

Q49. CPU stands for:

- A. Computer Processing Unit
- B. Central Processing Unit
- C. Core Processing Unit
- D. Control Processing Unit

Ans: B

Q50. GAIS stands for:

- A. Global Access Internet System
- B. Gateway Internet Access Service
- C. General Automated Internet Service
- D. Government Access Internet Service

Ans: B

Answer Key & Explanations

Q1. Answer: B — Database Management System

Page 494: DBMS: It stands for Database Management System. It is a software package to manage database.

Topic: Glossary

Q2. Answer: B — Dynamic Hyper Text Markup Language

Page 494: DHTML: It stands for Dynamic Hyper Text Markup Language. Used to create dynamic content on web pages.

Topic: Glossary

Q3. Answer: B — Disk Operating System

Page 494: DOS: It stands for Disk Operating System. It is an operating system.

Topic: Glossary

Q4. Answer: B — Hyper Text Markup Language

Page 494: HTML: It stands for Hyper Text Markup Language. It is used to create web-pages.

Topic: Glossary

Q5. Answer: B — Internet Architectural Board

Page 494: IAB: Internet Activities Board formed in 1983, now called Internet Architectural Board.

Topic: Glossary

Q6. Answer: B — Browsers

Page 494: IAS: Internet Application Software also known as Browsers.

Topic: Glossary

Q7. Answer: B — Internet Service Provider

Page 494: ISP: It stands for Internet Service Provider.

Topic: Glossary

Q8. Answer: B — The use of Internet

Page 494: Internet Society: It was formed in 1992 to promote the use of Internet.

Topic: Glossary

Q9. Answer: B — Get access to the information stored there

Page 494: Hacker: A person who breaks into a computer system to get access to the information stored there.

Topic: Glossary

Q10. Answer: B — General Mark-up Language

Page 494: GML: It stands for General Mark-up Language.

Topic: Glossary

Q11. Answer: B — Apple

Page 494: MAC OS: Operating System used in Macintosh Computer, developed by Apple.

Topic: Glossary

Q12. Answer: B — Graphical user interface

Page 494: Linux: It is a Unix like Operating System with graphical user interface.

Topic: Glossary

Q13. Answer: B — Telephone or cable lines

Page 494: Modem: device to connect different computer systems to the internet using telephone or cable lines.

Topic: Glossary

Q14. Answer: B — Software application

Page 494: Piracy: illegal reproduction and distribution of software application.

Topic: Glossary

Q15. Answer: B — Unique value for each record

Page 494: Primary Key: It is a field with unique value for each record.

Topic: Glossary

Q16. Answer: B — Relational Database Management System

Page 494: RDBMS: Relational Database Management System.

Topic: Abbreviations

Q17. Answer: B — Sun Microsystems

Page 494: SOLARIS: It is a Unix like Operating System developed by Sun Microsystems.

Topic: Glossary

Q18. Answer: B — The way the browser displays text in a Web Page

Page 494: Tag: It is part of HTML. It determines the way the browser displays text in a Web Page.

Topic: Glossary

Q19. Answer: B — Command line user interface

Page 494: Unix: powerful multiuser operating system. It uses command line user interface.

Topic: Glossary

Q20. Answer: B — Centre for Development of Advanced Parallel Computing

Page 494: CDAC: Centre for Development of Advanced Parallel Computing.

Topic: Abbreviations

Q21. Answer: B — Centre for Development Of Telematics

Page 494: C-DOT: Centre for Development Of Telematics.

Topic: Abbreviations

Q22. Answer: B — Hyper Text Transfer Protocol

Page 494: HTTP: Hyper Text Transfer Protocol.

Topic: Abbreviations

Q23. Answer: B — Read Only Memory

Page 494: ROM: Read Only Memory.

Topic: Abbreviations

Q24. Answer: B — Random Access Memory

Page 494: RAM: Random Access Memory.

Topic: Abbreviations

Q25. Answer: B — Basic Input-Output System

Page 494: BIOS: Basic Input-Output System.

Topic: Abbreviations

Q26. Answer: B — Modulation-Demodulation

Page 494: MODEM: Modulation-Demodulation.

Topic: Abbreviations

Q27. Answer: B — Computer Aided Design

Page 494: CAD: Computer Aided Design.

Topic: Abbreviations

Q28. Answer: B — Local Area Network

Page 494: LAN: Local Area Network.

Topic: Abbreviations

Q29. Answer: B — Wide Area Network

Page 494: WAN: Wide Area Network.

Topic: Abbreviations

Q30. Answer: B — Metropolitan Area Network

Page 494: MAN: Metropolitan Area Network.

Topic: Abbreviations

Q31. Answer: B — Electronic Numerical Integrator And Calculator

Page 494: ENIAC: Electronic Numerical Integrator And Calculator.

Topic: Abbreviations

Q32. Answer: B — Formula Translation

Page 494: FORTRAN: Formula Translation.

Topic: Abbreviations

Q33. Answer: B — Common Business Oriented Language

Page 494: COBOL: Common Business Oriented Language.

Topic: Abbreviations

Q34. Answer: B — Fascimile Automated Xerox

Page 494: FAX: Fascimile Automated Xerox.

Topic: Abbreviations

Q35. Answer: B — Floating Operations Per Second

Page 494: FLOPS: Floating Operations Per Second.

Topic: Abbreviations

Q36. Answer: B — High Level Language

Page 494: HLL: High Level Language.

Topic: Abbreviations

Q37. Answer: B — International Business Machine

Page 494: IBM: International Business Machine.

Topic: Abbreviations

Q38. Answer: B — Integrated Circuit

Page 494: IC: Integrated Circuit.

Topic: Abbreviations

Q39. Answer: B — Internet Protocol

Page 494: IP: Internet Protocol.

Topic: Abbreviations

Q40. Answer: B — Public Switched Telephone Network

Page 494: PSTN: Public Switched Telephone Network.

Topic: Abbreviations

Q41. Answer: B — Code Division Multiple Access

Page 494: CDMA: Code Division Multiple Access.

Topic: Abbreviations

Q42. Answer: B — Desk Top Publishing

Page 494: DTP: Desk Top Publishing.

Topic: Abbreviations

Q43. Answer: B — Desk Top System

Page 494: DTS: Desk Top System.

Topic: Abbreviations

Q44. Answer: B — Computer Aided Manufacturing

Page 494: CAM: Computer Aided Manufacturing.

Topic: Abbreviations

Q45. Answer: B — Computerised Axial Tomography Scan

Page 494: CATScan: Computerised Axial Tomography Scan.

Topic: Abbreviations

Q46. Answer: B — Common Algorithmic Language

Page 494: COMAL: Common Algorithmic Language.

Topic: Abbreviations

Q47. Answer: B — Disc Operating System

Page 494: DOS: Disc Operating System.

Topic: Abbreviations

Q48. Answer: B — Liquid Display Unit

Page 494: LDU: Liquid Display Unit.

Topic: Abbreviations

Q49. Answer: B — Central Processing Unit

Page 494: CPU: Central Processing Unit.

Topic: Abbreviations

Q50. Answer: B — Gateway Internet Access Service

Page 494: GAIS: Gateway Internet Access Service.

Topic: Abbreviations
