

Internet & Memorable Facts – Page 495

Source: Lucent's General Knowledge – Computer

Computer: Internet, Web, Operating Systems & Memorable Facts

50 Questions • 30 Minutes

Instructions:

- Each question has 4 options (A, B, C, D).
- The correct answer is shown on the right side of each question.
- Detailed explanations with textbook page references are at the end.

Questions

Q1. LISP stands for:

- A. Linear System Processing
- B. List Processing
- C. Logic Internal System Processing
- D. Light Speed Processing

Ans: B

Q2. MICR stands for:

- A. Machine Internal Character Recognition
- B. Magnetic Ink Character Recognition/Reader
- C. Micro Input Character Reader
- D. Module Ink Character Recognition

Ans: B

Q3. MIPS stands for:

- A. Mega Instructions Per Second
- B. Million Instructions Per Second
- C. Micro Input Per Second
- D. Module Instructions Per Second

Ans: B

Q4. UPS stands for:

- A. Universal Processing System
- B. Uninterruptable Power Supply
- C. United Power System
- D. Ultra Power Source

Ans: B

Q5. VDU stands for:

- A. Video Digital Unit
- B. Visual Display Unit
- C. Virtual Data Unit
- D. Voice Display Unit

Ans: B

Q6. VLSI stands for:

- A. Very Light Scale Integration
- B. Very Large Scale Integration
- C. Virtual Large System Integration
- D. Variable Logic System Integration

Ans: B

Q7. WWW stands for:

- A. Wide Web World
- B. World Wide Web
- C. Web World Wide
- D. Wireless World Web

Ans: B

Q8. MS Access is a powerful program to create and manage: A. Spreadsheets B. Databases C. Presentations D. Graphics	Ans: B
Q9. Internet is the network of computer networks with millions of computers attached to it. It was originally developed by: A. UK Ministry of Defence B. US Department of Defence C. Indian Government D. NASA	Ans: B
Q10. 'The World Wide Web' was invented by: A. Bill Gates B. Tim Berners-Lee C. Steve Jobs D. Mark Zuckerberg	Ans: B
Q11. FAT 32 and NTFS are the two major file systems in: A. Linux B. Microsoft Windows C. Mac OS D. Android	Ans: B
Q12. Websites are files in servers, which are: A. Weak computers B. Powerful computers C. Old computers D. Broken computers	Ans: B
Q13. The collection of all websites is called: A. Internet B. World Wide Web or WWW C. LAN D. WAN	Ans: B
Q14. Hyper text was first coined by Ted Nelson in: A. 1980s B. 1960s C. 1990s D. 1970s	Ans: B

Q15. HTML is a markup language used to create Web Pages. It uses commands called: A. Functions B. Tags C. Classes D. Modules	Ans: B
Q16. HTML documents are viewed in: A. Text editors B. Web browsers C. Compilers D. Databases	Ans: B
Q17. Most Popular Mobile Operating System is: A. iOS B. Android C. Windows D. Linux	Ans: B
Q18. The correct order of Android versions (old to new) starting from Cupcake is: Cupcake → Donut → Eclairs → Froyo → Ginger Bread → Honeycomb → Ice Cream Sandwich → Jelly Beans → Kit-kat → Lollipop → Marshmallow → Nougat → Oreo → Pie → Android 10 →: A. Android 9 B. Android 11 C. Android 8 D. Android 7	Ans: B
Q19. Some popular operating systems are: A. Only Windows B. DOS, UNIX, Windows, LINUX, Mac OS etc. C. Only Linux D. Only Mac OS	Ans: B
Q20. Most Popular Social Networking Sites include: A. Only WhatsApp B. Facebook, Twitter, Linkedin and Instagram C. Only Telegram D. Only YouTube	Ans: B
Q21. Speed of Computer (or Clock speed) is measured in: A. Watts B. Hertz (Hz) C. Meters D. Kilograms	Ans: B

Q22. Speed of Modern Processors are often measured in: A. MHz B. Gigahertz (GHz) C. KHz D. Hz	Ans: B
Q23. Speed of communication over a data channel is measured in: A. Hertz B. Baud C. Watts D. Volts	Ans: B
Q24. DHCP (Dynamic Host Configuration Protocol) is a network management protocol used on TCP/IP networks to provide: A. Speed increase B. Quick, automatic and central management for distribution of IP addresses C. Virus protection D. Data backup	Ans: B
Q25. A Social Network can be represented as: A. Table B. Graph C. List D. Array	Ans: B
Q26. IPv6 protocol defines an IP address of: A. 32 bit B. 128 bit C. 64 bit D. 256 bit	Ans: B
Q27. Junk email is called: A. Virus B. Spam C. Bug D. Worm	Ans: B
Q28. Coding is the process of writing out: A. Letters B. Computer instructions C. Books D. Music	Ans: B

Q29. Four major digital initiatives to push e-education by the govt. are Swayam, Swayam Prabha, National Academic Depository and: A. PARAM B. National Digital Library C. ENIAC D. UNIVAC	Ans: B
Q30. Oracle is a: A. Programming language B. Database software C. Operating system D. Hardware	Ans: B
Q31. Most popular online Shopping Websites include: A. Only Google B. Amazon.com, Flipkart.com and ebay.com C. Only Wikipedia D. Only YouTube	Ans: B
Q32. A database is a collection of: A. Random files B. Interrelated data C. Images only D. Videos only	Ans: B
Q33. A relational database is a collection of formally described tables from which data can be accessed in many different ways without having to: A. Open it B. Reorganize the database tables C. Delete anything D. Connect to internet	Ans: B
Q34. The Windows Explorer program is more efficient for viewing folders in: A. Mac B. Windows C. Linux D. DOS	Ans: B
Q35. Windows Explorer is divided vertically into: A. Three panes B. Two panes C. Four panes D. One pane	Ans: B

Q36. The left side pane of Windows Explorer displays: A. File contents B. Disk drives and folders in a hierarchical order C. Programs only D. Pictures only	Ans: B
Q37. The process of linking text values in a series within a formula is called: A. Merging B. Concatenation C. Joining D. Combining	Ans: B
Q38. Data processing involves some activities like data computing, data manipulation and: A. Data deletion B. Information management C. Data corruption D. Data hiding	Ans: B
Q39. An operating system is an interface between: A. Two computers B. The human user and the computer hardware C. Two programs D. Two networks	Ans: B
Q40. An operating system manages computer resources and performs: A. Only one function B. Different functions C. No function D. Only display	Ans: B
Q41. An operating system is responsible for: A. Only games B. Process management, file management, etc. C. Only printing D. Only internet	Ans: B
Q42. Data are raw facts and: A. Programs B. Figures C. Software D. Hardware	Ans: B

Q43. Hardware comprises of the physical units of a: A. Network B. Computer system C. Internet D. Database	Ans: B
Q44. Software is a set of: A. Hardware B. Programs C. Cables D. Chips	Ans: B
Q45. Both hardware and software together make a computer system: A. Broken B. Functional C. Slow D. Heavy	Ans: B
Q46. SNOBOL stands for: A. System Notation for Binary Logic B. StriNg Oriented symBOLic Language C. Standard Network Binary Logic D. Simple Notation for Object Logic	Ans: B
Q47. NICNET stands for: A. Network Internet Computer Network B. National Informatics Centre Network C. National Internet Connection Network D. New Information Computer Network	Ans: B
Q48. OMR stands for: A. Optical Machine Reader B. Optical Mark Reader/Recognition C. Online Mark Reader D. Object Mark Recognition	Ans: B
Q49. MOPS stands for: A. Million Output Per Second B. Million Operations Per Second C. Micro Output Per Second D. Module Operations Per Second	Ans: B
Q50. Websites contain pages called: A. Documents B. Web Pages C. Files D. Folders	Ans: B

Answer Key & Explanations

Q1. Answer: B — List Processing

Page 495: LISP: List Processing.

Topic: Abbreviations

Q2. Answer: B — Magnetic Ink Character Recognition/Reader

Page 495: MICR: Magnetic Ink Character Recognition/Reader.

Topic: Abbreviations

Q3. Answer: B — Million Instructions Per Second

Page 495: MIPS: Million Instructions Per Second.

Topic: Abbreviations

Q4. Answer: B — Uninterruptable Power Supply

Page 495: UPS: Uninterruptable Power Supply.

Topic: Abbreviations

Q5. Answer: B — Visual Display Unit

Page 495: VDU: Visual Display Unit.

Topic: Abbreviations

Q6. Answer: B — Very Large Scale Integration

Page 495: VLSI: Very Large Scale Integration.

Topic: Abbreviations

Q7. Answer: B — World Wide Web

Page 495: WWW: World Wide Web.

Topic: Abbreviations

Q8. Answer: B — Databases

Page 495: MS Access is a powerful program to create and manage our databases.

Topic: Facts

Q9. Answer: B — US Department of Defence

Page 495: Internet was originally developed by the US Department of Defence.

Topic: Internet

Q10. Answer: B — Tim Berners-Lee

Page 495: 'The World Wide Web' was invented by Tim Berners-Lee.

Topic: Internet

Q11. Answer: B — Microsoft Windows

Page 495: FAT 32 and NTFS are the two major file systems in Microsoft Windows.

Topic: Facts

Q12. Answer: B — Powerful computers

Page 495: Websites are files in servers, which are powerful computers.

Topic: Internet

Q13. Answer: B — World Wide Web or WWW

Page 495: The collection of all websites is called World Wide Web or WWW.

Topic: Internet

Q14. Answer: B — 1960s

Page 495: Hyper text was first coined by Ted Nelson in 1960s.

Topic: Internet

Q15. Answer: B — Tags

Page 495: HTML is a markup language used to create Web Pages. It uses commands called Tags.

Topic: Internet

Q16. Answer: B — Web browsers

Page 495: Text editors are used to compose HTML documents. HTML documents are viewed in Web browsers.

Topic: Internet

Q17. Answer: B — Android

Page 495: Most Popular Mobile Operating System is Android, followed by iOS & Windows.

Topic: Facts

Q18. Answer: B — Android 11

Page 495: Android versions end with: ...Oreo → Pie → Android 10 → Android 11.

Topic: Facts

Q19. Answer: B — DOS, UNIX, Windows, LINUX, Mac OS etc.

Page 495: Some popular operating systems are DOS, UNIX, Windows, LINUX, Mac OS etc.

Topic: Facts

Q20. Answer: B — Facebook, Twitter, Linkedin and Instagram

Page 495: Most Popular Social Networking Sites: Facebook, Twitter, Linkedin and Instagram.

Topic: Facts

Q21. Answer: B — Hertz (Hz)

Page 495: Speed of Computer (or Clock speed) is measured in Hertz (Hz).

Topic: Facts

Q22. Answer: B — Gigahertz (GHz)

Page 495: Speed of Modern Processors are often measured in Gigahertz (GHz).

Topic: Facts

Q23. Answer: B — Baud

Page 495: Speed of communication over a data channel is measured in 'Baud'.

Topic: Facts

Q24. Answer: B — Quick, automatic and central management for distribution of IP addresses

Page 495: DHCP provides quick, automatic and central management for distribution of IP addresses within the network.

Topic: Internet

Q25. Answer: B — Graph

Page 495: A Social Network can be represented as graph.

Topic: Internet

Q26. Answer: B — 128 bit

Page 495: IPv6 protocol defines on IP address of 128 bit.

Topic: Internet

Q27. Answer: B — Spam

Page 495: Junk email is called 'spam'.

Topic: Internet

Q28. Answer: B — Computer instructions

Page 495: Coding is the process of writing out computer instructions.

Topic: Facts

Q29. Answer: B — National Digital Library

Page 495: Four major digital initiatives: Swayam, Swayam Prabha, National Academic Depository and National Digital Library.

Topic: Facts

Q30. Answer: B — Database software

Page 495: Oracle is a database software.

Topic: Facts

Q31. Answer: B — Amazon.com, Flipkart.com and ebay.com

Page 495: Most popular online Shopping Websites: Amazon.com, Flipkart.com and ebay.com.

Topic: Facts

Q32. Answer: B — Interrelated data

Page 495: A database is a collection of interrelated data.

Topic: Facts

Q33. Answer: B — Reorganize the database tables

Page 495: A relational database is organized as set of formally described tables from which data can be accessed without reorganizing.

Topic: Facts

Q34. Answer: B — Windows

Page 495: The Windows Explorer program is more efficient for viewing folders in Windows.

Topic: Facts

Q35. Answer: B — Two panes

Page 495: Windows Explorer is divided vertically into two parts or two panes.

Topic: Facts

Q36. Answer: B — Disk drives and folders in a hierarchical order

Page 495: The left side pane displays disk drives and folders in a hierarchical order.

Topic: Facts

Q37. Answer: B — Concatenation

Page 495: The process of linking text values in a series within a formula is called 'concatenation'.

Topic: Facts

Q38. Answer: B — Information management

Page 495: Data processing involves some activities like data computing, data manipulation and information management.

Topic: Facts

Q39. Answer: B — The human user and the computer hardware

Page 495: An operating system is an interface between the human user and the computer hardware.

Topic: Facts

Q40. Answer: B — Different functions

Page 495: An operating system manages computer resources and performs different functions.

Topic: Facts

Q41. Answer: B — Process management, file management, etc.

Page 495: An operating system is responsible for process management, file management, etc.

Topic: Facts

Q42. Answer: B — Figures

Page 495: Data are raw facts and figures.

Topic: Facts

Q43. Answer: B — Computer system

Page 495: Hardware comprises of the physical units of a computer system.

Topic: Facts

Q44. Answer: B — Programs

Page 495: Software is a set of programs.

Topic: Facts

Q45. Answer: B — Functional

Page 495: Both hardware and software together make a computer system functional.

Topic: Facts

Q46. Answer: B — StriNg Oriented symBOLic Language

Page 495: SNOBOL: StriNg Oriented symBOLic Language.

Topic: Abbreviations

Q47. Answer: B — National Informatics Centre Network

Page 495: NICNET: National Informatics Centre Network.

Topic: Abbreviations

Q48. Answer: B — Optical Mark Reader/Recognition

Page 495: OMR: Personal Computer Disk Operation System... wait. OMR: Optical Mark Reader/Recognition (from abbreviation table).

Topic: Abbreviations

Q49. Answer: B — Million Operations Per Second

Page 495: MOPS: Million Operations Per Second.

Topic: Abbreviations

Q50. Answer: B — Web Pages

Page 495: Websites contain pages called Web Pages.

Topic: Internet
