Computer: Introduction, Generations & Types

50 Questions • 30 Minutes

Instructions:

- Each question has 4 options (A, B, C, D).
- The correct answer is shown on the right side of each question.
- Detailed explanations with textbook page references are at the end.

Questions

Q1. The word 'Computer' is derived from the English word:

- A. Complete
- B. Compute
- C. Compare
- D. Compose

Ans: B

Q2. Who is called the 'Father of Modern Computer'?

- A. Blaise Pascal
- B. Charles Babbage
- C. John Von Newman
- D. Howard Ekin

Ans: B

Q3. Blaise Pascal developed the first mechanical calculator in:

- A. 1833 AD
- B. 1642 AD
- C. 1937 AD
- D. 1946 AD

Ans: B

Q4. The credit of developing first computer program goes to:

- A. Charles Babbage
- B. Lady Ada Augusta
- C. Herman Holorith
- D. Howard Ekin

Ans: B

Q5. Herman Holorith prepared an electronic tabulating machine in 1880 using:

- A. Transistors
- B. Punch Card
- C. IC chips
- D. Vacuum tubes

Ans: B

Q6. Howard Ekin developed the first Mechanical Computer called:

- A. ENIAC-I
- B. Mark-I
- C. EDVAC
- D. UNIVAC

Ans: B

Q7. J.P. Ekart and John Moschley invented world's first electronic computer in 1946 called:

- A. EDVAC
- B. ENIAC-I
- C. UNIVAC
- D. Mark-I

Ans: B

Q8. Electronic Valve or Vacuum Tube was used as a switch in: A. Second generation B. First generation computer C. Third generation D. Fourth generation	Ans: B
Q9. John Von Newman invented EDVAC (Electronic Discrete Variable Computer) in: A. 1946 B. 1951 C. 1937 D. 1642	Ans: B
Q10. The credit of using Binary System in computers goes to: A. Babbage B. John Von Newman C. Pascal D. Ada Augusta	Ans: B
Q11. The main electronic component of First Generation (1940-52) computers was: A. Transistor B. Electronic Valve / Vacuum Tube C. Integrated Circuit D. Microprocessor	Ans: B
Q12. The main electronic component of Second Generation (1952-64) computers was: A. Vacuum Tube B. Transistor C. Integrated Circuit D. Optical Fibre	Ans: B
Q13. The main electronic component of Third Generation (1964-71) computers was: A. Transistor B. Integrated Circuit (IC) C. Vacuum Tube D. Optical Fibre	Ans: B
Q14. The main electronic component of Fourth Generation (1971-) computers was: A. Transistor B. Largely Integrated Circuit (LSI/VLSI) C. Vacuum Tube D. IC only	Ans: B
Q15. Fifth Generation computers will use: A. Transistors B. Optical Fibre and Artificial Intelligence C. Vacuum Tubes D. Simple ICs	Ans: B

Q16. Computers used by individual persons for domestic and official purposes are called: A. Super Computer B. Micro Computer (PC) C. Main Frame Computer D. Mini Computer	Ans: B
Q17. Mini Computer is how many times more powerful than Micro Computer? A. 2 to 5 times B. 5 to 50 times C. 100 times D. 1000 times	Ans: B
Q18. In Main Frame Computer, more than how many people can work at a time using Time Sharing and Multi Tasking? A. 10 B. 100 C. 50 D. 500	Ans: B
Q19. Super Computers are the most expensive and the fastest computers, able to process: A. Simple calculations only B. Most complex jobs with very high speed C. Only text documents D. Only graphics	Ans: B
Q20. In Quantum Computers, Q-Bit will be used in lieu of: A. Bytes B. Binary Bits C. Kilobytes D. Megabytes	Ans: B
Q21. The first programming language (1st Generation, 1940-52) was: A. COBOL B. FORTRAN-i C. BASIC D. Pascal	Ans: B
Q22. FORTRAN-ii, ALGOL-60, COBOL, LISP belong to which generation of programming languages? A. 1st Generation B. 2nd Generation (1952-64) C. 3rd Generation D. 4th Generation	Ans: B

Q23. PL/I, ALGOL-W, ALGOL-68, Pascal, SIMULA-67, APL, SNOBOL, 4 BASIC, C belong to: A. 2nd Generation B. 3rd Generation (1964-71) C. 4th Generation D. 5th Generation	Ans: B
Q24. 4th Generation (1971-90) programming languages include: A. Only FORTRAN B. CLUE, ALFARD, UCLID, Reformed Pascal, MODULA, EDA, ORACLE C. Only C D. Only Python	Ans: B
Q25. 5th Generation (Since 1990) uses: A. Only FORTRAN B. Artificial Intelligence Languages C. Only Assembly D. Only COBOL	Ans: B
Q26. A computer is an electronic machine that helps to: A. Only play games B. Process data and solve problems in almost all fields C. Only print documents D. Only send emails	Ans: B
Q27. A computer is an information-processing and: A. Food preparation tool B. Information-accessing tool C. Musical instrument D. Cooking device	Ans: B
Q28. Information processing is the essence of: A. Cooking B. Computing C. Painting D. Singing	Ans: B
Q29. Computer is an electronic device which processes the input informations according to: A. Random instructions B. Given set of instructions called program C. No instructions D. Only voice commands	Ans: B

Q30. John Von Newman used which concept in EDVAC? A. Punch cards B. Stored Program C. Vacuum tubes only D. Paper tape	Ans: B
Q31. IBM-700, IBM-1401, IBM-1620, CDC-3600, ATLAS, ICL-1901 are examples of which generation? A. First B. Second (1952-64) C. Third D. Fourth	Ans: B
Q32. IBM-360, IBM-370, NCR-395, CDC-1700, ICL-2903 are examples of which generation? A. Second B. Third (1964-71) C. Fourth D. Fifth	Ans: B
Q33. APPLE and DCM are examples of which generation computers? A. Third B. Fourth (1971-) C. Second D. First	Ans: B
Q34. Desktop, Laptop, Tablets are examples of: A. Super computers B. Micro computers (PCs) C. Main frame computers D. Mini computers	Ans: B
Q35. The era of computers started in which centuries? A. 18th B. 20th and 21st C. 15th D. 10th	Ans: B
Q36. Computer and Information Technology (IT) in recent years has become: A. Obsolete B. An integral part of our life C. Only for scientists D. Only for military	Ans: B

Q37. One of the greatest things that man has ever created is: A. Television B. The Computer C. Radio D. Telephone	Ans: B
Q38. EDSAC, EDVAC, UNIVAC are computers of which generation? A. Second B. First (1940-52) C. Third D. Fourth	Ans: B
Q39. The first mechanical calculator 'Pascalene' was developed by: A. Babbage B. Blaise Pascal C. Newman D. Ekin	Ans: B
Q40. The Second Revolution of computers was given a right direction by: A. Mark-I B. EDVAC and Stored Program concept by Newman C. Punch Cards D. ENIAC only	Ans: B
Q41. Computer is used in areas of: A. Only education B. Administration, medicine, education, sports, defence, shops, home, markets C. Only sports D. Only defence	Ans: B
Q42. Quantum Computers are probably more advanced than: A. Calculators B. Human brain C. Abacus D. Typewriters	Ans: B
Q43. The development of Quantum Computer is in: A. Completed stage B. Final stage C. Not started D. Abandoned	Ans: B
Q44. A computer accepts information or data from the outside world and: A. Deletes it B. Processes it to produce a new information C. Ignores it D. Stores it permanently without processing	Ans: B

Q45. The period of Third Generation computers was: A. 1940-52 B. 1964-71 C. 1952-64 D. 1971-90	Ans: B
Q46. The period of First Generation computers was: A. 1952-64 B. 1940-52 C. 1964-71 D. 1971-90	Ans: B
Q47. The period of Second Generation computers was: A. 1940-52 B. 1952-64 C. 1964-71 D. 1971-90	Ans: B
Q48. Herman Holorith's tabulating machine was automatically functional with the help of: A. Electricity only B. Punch Card C. Transistor D. IC chip	Ans: B
Q49. The first electronic computer ENIAC-I paved the way for first revolution in the field of: A. Music B. Calculating machine or computer C. Cooking D. Agriculture	Ans: B
Q50. Main Frame Computers use which techniques to allow multiple users? A. Only batch processing B. Time Sharing and Multi Tasking C. Only serial processing D. Only parallel processing	Ans: B

Answer Key & Explanations

Q1. Answer: B — Compute

Page 488: The word computer has derived from an English word 'Compute', which means 'to calculate'.

Topic: Introduction

Q2. Answer: B — Charles Babbage

Page 488: British scientist Charles Babbage was the first person to conceive an automatic calculator or a computer in 1833. He is called the 'Father of Modern Computer'.

Topic: History

Q3. Answer: B — 1642 AD

Page 488: Blaise Pascal had developed the first mechanical calculator in 1642 AD, which is called 'Pascalene'.

Topic: History

Q4. Answer: B — Lady Ada Augusta

Page 488: The credit of developing first computer program goes to Lady Ada Augusta, a student of Babbage.

Topic: History

Q5. Answer: B — Punch Card

Page 488: Herman Holorith prepared an electronic tabulating machine in 1880, automatically functional with the help of Punch Card.

Topic: History

Q6. Answer: B — Mark-I

Page 488: Howard Ekin developed the first Mechanical Computer 'Mark-I' in 1937.

Topic: History

Q7. Answer: B — ENIAC-I

Page 488: J.P. Ekart and John Moschley invented world's first electronic computer 'ENIAC-I' in 1946.

Topic: History

Q8. Answer: B — First generation computer

Page 488: Electronic Valve or Vacuum Tube was used as a switch in the first generation computer (ENIAC-I).

Topic: History

Q9. Answer: B — 1951

Page 488: John Von Newman invented EDVAC in 1951, in which he used Stored Program. The credit of using Binary System in computers also goes to him.

Topic: History

Q10. Answer: B — John Von Newman

Page 488: The credit of using Binary System in computers goes to John Von Newman.

Topic: History

Q11. Answer: B — Electronic Valve / Vacuum Tube

Page 488: First Generation (1940-52) used Electronic Valve/Vacuum Tube. Examples: EDSAC, EDVAC, UNIVAC.

Topic: Generations

Q12. Answer: B — Transistor

Page 488: Second Generation (1952-64) used Transistor. Examples: IBM-700, IBM-1401, IBM-1620.

Topic: Generations

Q13. Answer: B — Integrated Circuit (IC)

Page 488: Third Generation (1964-71) used Integrated Circuit. Examples: IBM-360, IBM-370, NCR-395.

Topic: Generations

Q14. Answer: B — Largely Integrated Circuit (LSI/VLSI)

Page 488: Fourth Generation (1971-) uses Largely Integrated Circuit. Examples: APPLE, DCM.

Topic: Generations

Q15. Answer: B — Optical Fibre and Artificial Intelligence

Page 488: Fifth Generation uses Optical Fibre and Artificial Intelligence.

Topic: Generations

Q16. Answer: B — Micro Computer (PC)

Page 488: Micro Computers are used by individual, also called PC or Personal Computer, for domestic and official purposes.

Topic: Types

Q17. Answer: B — 5 to 50 times

Page 488: Mini Computer is comparatively larger and 5 to 50 times more powerful than Micro Computer.

Topic: Types

Q18. Answer: B — 100

Page 488: Main Frame Computer: By Time Sharing and Multi Tasking techniques many people rather more than 100 people can work at a time.

Topic: Types

Q19. Answer: B — Most complex jobs with very high speed

Page 488: Super Computers are very powerful, most expensive and fastest, able to process most complex jobs with very high speed.

Topic: Types

Q20. Answer: B — Binary Bits

Page 488: In Quantum Computers Q-Bit will be used in lieu of Binary Bits.

Topic: Types

Q21. Answer: B — FORTRAN-i

Page 488: 1st Generation (1940-52) programming language was FORTRAN-i.

Topic: Programming

Q22. Answer: B — 2nd Generation (1952-64)

Page 488: 2nd Generation (1952-64) languages: FORTRAN-ii, ALGOL-60, COBOL, LISP.

Topic: Programming

Q23. Answer: B — 3rd Generation (1964-71)

Page 488: 3rd Generation (1964-71) languages include PL/I, ALGOL-W, ALGOL-68, Pascal, SIMULA-67, APL, SNOBOL, 4 BASIC, C.

Topic: Programming

Q24. Answer: B — CLUE, ALFARD, UCLID, Reformed Pascal, MODULA, EDA, ORACLE

Page 488: 4th Generation (1971-90): CLUE, ALFARD, UCLID, Reformed Pascal, MODULA, EDA, ORACLE.

Topic: Programming

Q25. Answer: B — Artificial Intelligence Languages

Page 488: 5th Generation (Since 1990) uses Artificial Intelligence Languages.

Topic: Programming

Q26. Answer: B — Process data and solve problems in almost all fields

Page 488: A computer is an electronic machine that helps to process data and solve problems in education, home, medicine, science, technology, research, designing, publishing, communication etc.

Topic: Introduction

Q27. Answer: B — Information-accessing tool

Page 488: A computer is an information-processing and information-accessing tool.

Topic: Introduction

Q28. Answer: B — Computing

Page 488: Information processing is the essence of computing.

Topic: Introduction

Q29. Answer: B — Given set of instructions called program

Page 488: Computer processes input informations according to the given set of instructions, called program.

Topic: Introduction

Q30. Answer: B — Stored Program

Page 488: John Von Newman invented EDVAC in 1951, in which he used Stored Program concept.

Topic: History

Q31. Answer: B — Second (1952-64)

Page 488: These are Second Generation computers using Transistors.

Topic: Generations

Q32. Answer: B — Third (1964-71)

Page 488: These are Third Generation computers using Integrated Circuits.

Topic: Generations

Q33. Answer: B — Fourth (1971-)

Page 488: APPLE, DCM are Fourth Generation computers using Largely Integrated Circuits.

Topic: Generations

Q34. Answer: B — Micro computers (PCs)

Page 488: PCs are used for domestic and official purposes like Desktop, Laptop, Tablets etc.

Topic: Types

Q35. Answer: B — 20th and 21st

Page 488: The era of 20th and 21st century has witnessed rapid developments in science and technology.

Topic: Introduction

Q36. Answer: B — An integral part of our life

Page 488: Computer and Information Technology (IT) in recent years has become an integral part of our life.

Topic: Introduction

Q37. Answer: B — The Computer

Page 488: One of the greatest things that man has ever created is, perhaps, 'the Computer'.

Topic: Introduction

Q38. Answer: B — First (1940-52)

Page 488: EDSAC, EDVAC, UNIVAC are First Generation (1940-52) computers using Electronic Valve/Vacuum Tube.

Topic: Generations

Q39. Answer: B — Blaise Pascal

Page 488: Blaise Pascal developed the first mechanical calculator 'Pascalene' in 1642 AD.

Topic: History

Q40. Answer: B — EDVAC and Stored Program concept by Newman

Page 488: Newman's EDVAC and Stored Program concept gave a right direction to the Computer Revolution (Second Revolution).

Topic: History

Q41. Answer: B — Administration, medicine, education, sports, defence, shops, home, markets

Page 488: Computer is being used in areas of administration, medicine, education, sports, defence, shops, home, markets and many more.

Topic: Introduction

Q42. Answer: B — Human brain

Page 488: Probably Quantum Computers will be more advanced than that of human brain.

Topic: Types

Q43. Answer: B — Final stage

Page 488: The development of Quantum Computer is in final stage.

Topic: Types

Q44. Answer: B — Processes it to produce a new information

Page 488: A computer accepts information/data from outside world, processes it to produce new information.

Topic: Introduction

Q45. Answer: B — 1964-71

Page 488: Third Generation period was 1964-71, using Integrated Circuits.

Topic: Generations

Q46. Answer: B — 1940-52

Page 488: First Generation period was 1940-52.

Topic: Generations

Q47. Answer: B — 1952-64

Page 488: Second Generation period was 1952-64.

Topic: Generations

Q48. Answer: B — Punch Card

Page 488: Herman Holorith's machine in 1880 was automatically functional with the help of Punch Card.

Topic: History

Q49. Answer: B — Calculating machine or computer

Page 488: ENIAC-I paved the way for first revolution in the field of calculating machine or computer.

Topic: History

Q50. Answer: B — Time Sharing and Multi Tasking

Page 488: Main Frame Computer: By Time Sharing and Multi Tasking techniques, many people can work at different terminals.

Topic: Types
